

# Faster time to market requires faster decisions

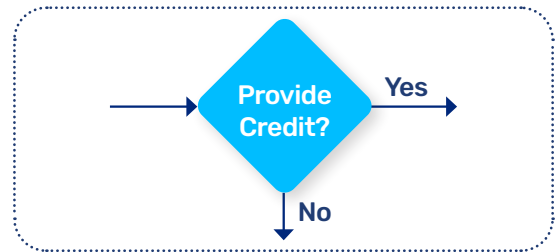

Decision logic reflects your business policies, regulations, and operating procedures. It's this logic, integrated with AI models and enterprise systems, that needs to stay current...otherwise you're stuck behind the competition. Sapiens Decision eliminates the backlog for logic updates and operationalizes ML models to accelerate your business agility.

## How does it work?

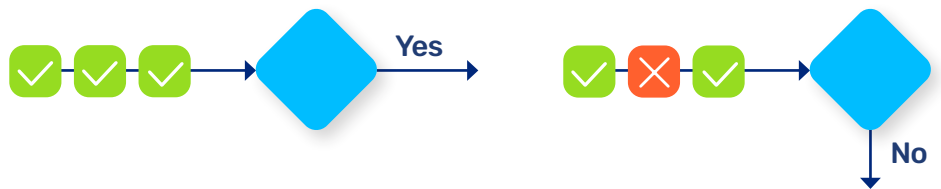

Sapiens Decision externalizes decision logic associated with complex decisions and makes it faster and more cost efficient to manage.

Application, Rules Engine, AI/ML model, etc

Users create models to deconstruct decisions. Models are easily updated, tested and deployed rapidly via API.

Decision model automates outcomes

Decision models can be developed to enable high value use cases across the enterprise.

Innovative use cases for speed, accuracy, auditability

## Why Sapiens Decision

### Speed

Decoupled from the IT lifecycle, faster update cycles drive faster time to market

### Transparency

Decisions are more visible and fully auditable, ML models are less opaque

### Accuracy

Methodology based approach with auto-validation and testing ensures error free performant code

### Transformation

Enables non-technical business users and support for self-service models

### Easy to use

True no code tools enhanced with GenAI and drag and drop UI

# Sapiens Decision use cases for Banking and Capital Markets

Sapiens Decision is an enterprise AI Decisioning system that decouples decision logic from application code and frees business from traditional IT lifecycles without the perils of shadow IT.

## How to get started

- 1 Contact us at [info.sapiens@sapiens.com](mailto:info.sapiens@sapiens.com) to set up a short discovery call
- 2 Set up a 30-day pilot to help you evaluate the product and capability for your organization
- 3 Request access to Sapiens University to receive micro-trainings on how to use the product
- 4 Request a reference call with one of our existing customers (*did you know we're at 4 of the top 5 US banks?*)
